About me

I am a passionate full stack web developer with skills aimed at problem solving and continuous improvement of the user experience. My approach is not limited to simply coding, but extends to creating practical and useful solutions that truly impact users' lives. With a strong understanding of front-end and back-end technologies, I strive to build intuitive and efficient web applications. My professional goal is to contribute to the development of products that not only meet technical standards, but also offer an exceptional user experience, thus making the lives of those who interact with my creations easier.

Jobs

Salonero

Jan 2024 - Actual

Full Stack Developer

MVP Project

I am currently working as a full-stack developer on an MVP (Minimum Viable Product) project for a website dedicated to simplifying the search for event venues. In this stage I am in charge of obtaining information from the Google Places API, designing and creating the database in PostgreSQL and seeding it. Create the logic to search for the places, participate in the project design.

stack: NextJS, TypeScript, Material UI, tailwind, postgresSQL

Freelance Contract

Apr 2021 - Jul 2023

Front End Developer

Web platform replacement for a company dedicated to digital marketing

I started by modifying the original platform, which allowed me to gain the experience of being able to read code made by other developers and make the necessary modifications. In the second stage I joined the team in charge of developing the new platform, which consists of a tool that predicts the advertising budget that clients must invest. My main tasks were: implementation and configuration of Material UI, complex data filters, design and creation of reusable React components, Hooks and pages, collaborating on UX design, implementation of Google Analytics, pair programming, Pull Request approval

stack: React, TypeScript, Redux, Material UI

Education
